| excedura muni fill of the est by l | Remarks: For use other than irrigation or stock watering, state number and type of units to be served or annual consumptive use. This application and any others filed in this basin by Washoe County are appropriate all of the unappropriated groundwater. The diversion is anticipated to seed the perennial yield of the basin for limited periods of time. This limited ation over-pumpage will provide a supplemental supply of water to augment the quasicipal use of surface water during droughts or other short-term emergencies and to reservoirs. The 20 year average consumptive use will not exceed the perennial yield the groundwater basin. To allow the basin to replenish its storage by natural means, normal (non-drought period) consumptive use will be about 80 to 90 percent of the imated perennial yield. This water will be commingled with other waters appropriated ashoe County to serve a county-wide population of 500.000 by the year 2030. By s/Michael Widmer WASHOE COUNTY UTILITY DIVISION P.O.
